

ASBURY UNIVERSITY
1 Macklem Drive, Wilmore, KY 40390

2022 - 2023

Secondary Education Opportunities
Biology and Chemistry Science Labs

Our Goals

Our programs are designed to provide practical **lab experience** for students who have completed or are currently studying **chemistry** and/or **biology** on a **high-school** level in a **home-school** environment. Kentucky graduation requirements include “3 credits that shall incorporate lab-based scientific investigation experiences and include the content contained in the Kentucky core academic standards for science.”

Asbury University has the resources to provide your home-schooled student with a top-notch learning experience in a well-equipped laboratory setting.

Our Laboratory Program

Since home school programs use a variety of learning resources, the labs will not always coordinate with your class lessons. However, each lab has been designed as an independent learning unit. The techniques and concepts presented should be universal to any natural science program. A detailed syllabus will be available before classes start.

Our Student Expectations

Students should always come to lab prepared by reading the lab and related material in their own textbooks. **Preparing for lab is their homework!**

Students should be committed to attending all the lab sessions for each semester. **No makeup labs can be provided.** Tuition cannot be refunded for missed labs. Individual grades will be given for each lab attended each semester. There is no penalty for missing a lab.

Semester Schedule

Six labs per semester scheduled for every two weeks.

Fall semester begins September 9, 2022

Spring semester begins January 27, 2023

Cancellation and rescheduling of labs may occur.

Home School labs are cancelled due to weather only if the campus is closed.

Location

Biology: Walter & Rowena Shaw CLC Building, Room 204

Chemistry: Walter & Rowena Shaw CLC Building, Room 214

Tuition

\$150.00 per semester payable to Asbury University on line or by check.

Tuition should be paid before the first lab each semester.

Lab Manual

The cost of the manual, which covers two semesters, is included in the Fall tuition. Each student will receive a lab manual during the first lab.

Liability

Parents or guardians must fill out/sign a Release of Liability and Medical Consent on line. Students must obey the safety rules which are included in the manual.

Registration

Biology 1 – 4 PM

Chemistry 1 – 4 PM

Registration, tuition payments, and the release form are [online](#), along with syllabi and campus map. The deadline for registration is August 20, 2022. This date will be extended if space is still available.
